Job Title

Product Innovation Engineer

Job Description:

The Product Innovation Engineer will work closely with both our clients and our internal teams to prioritize, plan and coordinate development of our software products. The work will be dynamic and on the cutting-edge of supply chain solutions development within Arété. The Product Innovation Engineer will be a high-exposure member of the team and will be critical in the success of new and existing products.

The key to success in this role is maintaining the attitude that solutions can always be found when issues arise and that all commitments to clients are tracked, updated and delivered. An entrepreneurial candidate with confidence in their own ability to solve problems will excel in this role.

Job Responsibilities:

- Prioritize client requests managing internal release cycle
- Desire to work in both business and technical areas in a customer-facing role
- Clarify requirements from clients and internal teams, as technically as needed
- Develop software specifications based upon client/internal requirements
- Present complex quantitative concepts to clients or internal teams
- Manage implementation/rollout of new software products
- Analyze software gaps versus competitors
- Define new enhancements/modules to be added

Relevant Experience:

- Project Management
- Software Life cycle Management
- Programming Experience
- Team Leadership
- Supply Chain Management
- Quality Assurance

Relevant Skill Set:

- Knowledge of basic statistics and regression techniques
- Strong problem-solving skills
- Excellent written and verbal communication skills
- A strong work ethic and a desire to find solutions, deliver on commitments, and constantly improve
- Technical Knowledge

Company
